The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/531,227	<b>Applicant(s)</b> ARNAUD, CHRISTOPHE	
	<b>Examiner</b> Daniel S. Metzmaier	<b>Art Unit</b> 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

Claims 1-9 and 20-26 are pending.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7, 9, 20 and 25-26 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nakashima et al, US 5,326,484. Nakashima et al (abstract, figures 4 and 5; column 1, lines 62 et seq; column 6, lines 33 et seq, particularly column 7, lines 1 et seq; column 7, lines 50 et seq; column 8, lines 54 et seq; column 9, lines 30-35; examples and claims) discloses methods of emulsification employing concentric tubes, wherein the inner tube is porous. The apparatus is connected to mechanical devices including gas pressure devices and a pump. Furthermore, Nakashima et al (column 9, lines 30-35) discloses the emulsions formed may have use in pharmaceuticals and cosmetics.

At least the mechanical vibration type would have been inherent to employing the Nakashima et al devices as disclosed therein for making emulsions.

To the extent the Nakashima et al differs from the claims in the sufficiency of the disclosed methods of making the emulsions, it would have been obvious to one of ordinary skill in the art at the time of applicants' invention to combine like soluble materials for ease of mixing and/or vary the order of mixing the ingredients based on the desired internal or external phase noted in the Nakashima et al reference and conventional in the art.

***Allowable Subject Matter***

4. Claims 8 and 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments filed 07 January 2009 have been fully considered but they are not persuasive.

6. Applicants' (pages 7 and 8) reference to the figure amounts to reading limitations into the claim. Claims are given their broadest reasonable interpretation during prosecution.

7. Applicants' (pages 9 and 10) arguments that the Nakashimi et al reference fails to disclose vibrations applied to the porous body have not been deemed persuasive since the breadth of the claims is broad enough to encompass the vibrations of the Nakashima et al apparatus.

Art Unit: 1796

8. Applicants' (pages 10 and 11) arguments regarding the effectiveness of the Nakashima et al apparatus must take the form of evidence in the record to be probative and any evidence must be commensurate in scope with the claims. Applicants remarks regarding inhibition of coalescence has not been deemed persuasive.

9. Applicants statement of the interview is acknowledged.

### ***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
